

CoboSense

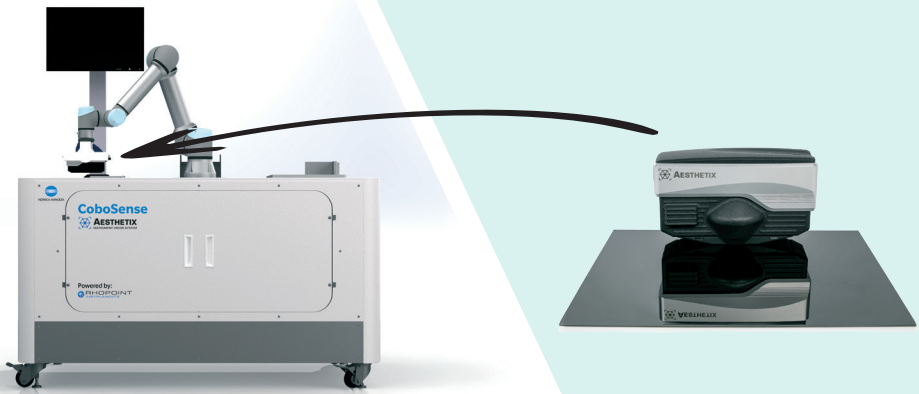

AESTHETIX

ELEVATE SURFACE QUALITY

ALL-IN-ONE, COBOT-DRIVEN APPEARANCE MEASUREMENT

Empowered by the state-of-the-art Rhopoint Aestheticix® technology, Konica Minolta's surface inspection station CoboSense boosts efficiency and propels industry standards for material analysis to unprecedented heights.

ONE SYSTEM, VARIOUS SURFACE CHARACTERISTICS MEASURED

- Gloss, Reflection Haze, Sparkle, Texture, and more...
- HDR dual camera technology
- Integrated software for surface data display and analysis
- Compatible with existing international standards
- Captures the surface characteristics below human visual resolution and merges them with human visual perception.

YOUR BENEFITS

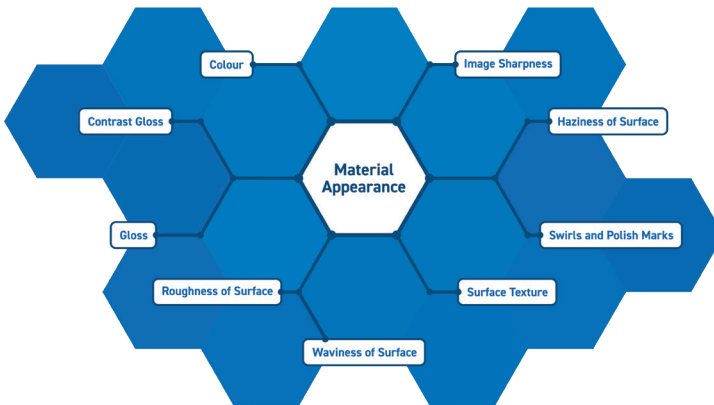

- automated measurement and analysis
- cutting-edge, research-based technology
- increased efficiency and productivity
- reduced maintenance costs
- standardised material quality

CO-DEVELOPED BY:

Aesthetix® is an advanced system that predicts the impact of surface quality on consumer perception using new measurement metrics. It is also the first device to not only give you a technical judgement, but also a visual assessment of surfaces. Measurements, surface maps and images are displayed and analysed in a comprehensive software package suitable for research and quality control applications.

KEY INDUSTRY APPLICATIONS

AUTOMOTIVE INTERIORS

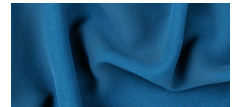

PLASTICS

PACKAGING

TEXTILE

CERAMICS

PAINTS & COATINGS

FURNITURE

AND MORE...
